Preparing for Winter

It's time to prepare your home and property for winter. Tackling a few fall home maintenance tasks now can ward off issues later in the season.

- Clean out your gutters.
- Seal up air leaks.
- Inspect your roof.
- Protect faucets from freezing temperatures.
- Give your furnace a checkup.
- Replace your furnace & humidifier filters.
- Change the batteries in your smoke & CO2 detectors.

These are just a few of things you should do to prepare for the coming cold.

Many of these you can do yourself, but a quick Google search will reveal local professionals available to assist as well.

Household Garbage Bins

A friendly reminder to bag your household or shop garbage. Loose garbage being dump into large bins create issues of flying debris and ends up outside our property boundaries with our high winds.

If you loose items on the way to the site, please stop and pick it up.
